The documentary Marcus Vetter, "Ôhe Forecaster» / "The forecaster" (projected Tuesday 29/9 at 20.00 at the French Institute - Sina 31- by Cinedoc, in collaboration with the Goethe Institute), we know the world famous economist Martin 'Armstrong, who has produced for decades, a computer model, according to which can be provided with day precision upcoming economic crises.

Born in 1949, he became a millionaire at 15 and very quickly managed to advise capitalists, companies and banks in the most effective manner. Early 1980 Martin 'Armstrong developed a

Shutterstock Simple & Affordable Pricing, Beautiful Images. Start Creating

Martin Armstrong developed a computational model where is said to predict with frightening precision the global economic turning points. This model everyone wants to 't get it. In 1999 the FBI raided his office and confiscated his computer.

He spent 12 years in prison - without a court order - for fraud. They wanted to silence him? In any case the next big global sovereign debt crisis and the collapse of the euro sees' rchetai by October 2015 and the next big shock in 2017. The model predicted with great accuracy the fall in the Nikkei index in 1989 the crisis in Russia in 1998. We spoke with the director of the documentary, which together with himself 'Armstrong will be tomorrow at the French Institute, to discuss live with the public.

**Your hero, Martin Armstrong, became a millionaire too early and seems to have been greatly influenced by his family.**

"Family is very important for the life of Martin. He lived with his mother, until recently, not because they had personal life himself, but because he did not want to put her in a nursing home. His father was a lawyer. I do not know exactly what was the relationship between them, but I was quite competitive, which is why Martin very early at his own funds handling mechanisms and at 15 was already a millionaire. Now, Martin has one daughter, who did not want to take part in the documentary, until towards the end of filming decided to grant us an interview. This was a gift for us, as shown by the side of Martin as a father. "

### **What man is Martin?**

"I believe that Martin 'Armstrong is a very curious person, with multiple aspects, who knows very well what he is talking about. Just because he has studied very well history. He started as a collector of coins and interested very early in the research on the economy of antiquity. He studied economic models to 6000 BC So, really knows what it means to be global economy. On the other hand, it is a great programmer and has served as a business consultant, banks and funds. It has managed occasionally trillion dollars. All these talents, all these have made the knowledge - apart from very rich - and an extremely interesting man, with only the most desire to help society itself. It is one of the few on the planet, already since the early 90s, revealed that "the emperor has no clothes" (referring to the world banking system and games markets). Since then he says even says, that Member carriers may not repay their debts. It is "ridiculous" that

Germany requests Greece to pay everything you owe, with interest, when she has not done! "

### **How was your cooperation during the filming?**

"It took time to gain their trust. However, eventually organized the whole conference in Philadelphia, especially for the needs of shooting, which supposedly was the last before put him in prison on charges of "public fraud" without evidence and without ever going through trial. As you understand, we did not want just to show how he lives his personal life (although we have a scene that shaved) ... I was looking for the Martin years. In my documentary about global poverty and hunger (HUNGER, ARD), in 2008, I wanted to I get interviewed but was in prison and it was impossible. Once released from prison in 2011, he contacted my lawyer and we agreed on the "Forecaster" ». He, though trisekatommyriouchos (when speaking / apology to Congress, held 3 trillion., While the US debt was 6 trillion.) Was jailed for 12 years.

### **How has this?**

"He says he did what he did" because it could ". Of course, he does not waste time in vain. He studied Law and expanded the economic model. However, it is difficult and emotionally for a healthy man can not understand why we have for 12 years of his life to the freedom removed, so without any justification. This is why he tries to find a justification. He says he did just because he could manage huge amounts of money without thinking "money" and that created a model that predicts the economic crisis and is in the interest of citizens, which of course no capitalist does not want it. It is not easy to believe that the system (and the judiciary) is so corrupt, so depriving your rights and freedoms, so "because they can". Looking himself to find a reason ... "

### **Why such a documentary is important to have?**

"For two reasons. First, deposit the views of Martin. According to them, the source of every problem - hunger, social injustice, fascism ... all come from the inability of governments to pay off the borrowed money. We can not ask the states to repay debts with exorbitant interest rates indefinitely. He says Martin and this talk about national debts - that have destroyed people and still do - should be done in schools, universities, everywhere, so that the younger generations have greater knowledge about the subject. The second reason is part of the first. I believe it is very important to know as much as we can for the world

economy. We can not let those who are called "experts"

and we do not remain impassive. We must become shareholders of this knowledge - it is important for our lives, for our children, for our future ... This film just trying to do. "

### What are preparing for the future?

"I am preparing a documentary about a German who was imprisoned in England for 30 years and was innocent! He was 17 years old, lived in England and had fallen in love with Elizabeth, which is abused by her mother. He was only three months together as a couple, until Elizabeth one day he killed her parents. And the German friend, the Jens, decided to say that he did and stay imprisoned for 30 years! "
